12-32 TestRail Report

33-48 Bug Reporting (Jira)

Introduction

The current project was carried out as part of the requirements of a Software Testing (QA) course.

It focuses on building a comprehensive Software Test Report (STR) for the Ramy Levy online shopping website, one of the leading e-commerce platforms in Israel.

Throughout the course, I gained practical knowledge in manual testing methodologies, writing detailed test scenarios (Test Cases), and reporting defects (Bugs), while using professional test management tools.

As part of this project, I applied the knowledge I acquired to a live web-based system. I designed and executed test scenarios on the Ramy Levy website, identified findings, and documented defects using Jira for bug tracking and monitoring.

Additionally, I organized and managed the testing process and test execution results using TestRail, ensuring proper documentation, traceability, and structured reporting.

This project simulates a real-world QA working environment and was intended to develop practical testing skills while strengthening my understanding of end-to-end software testing processes.

Purpose

The objective of this testing process is to evaluate the Ramy Levy online shopping website comprehensively, focusing on **quality, stability, and usability** from an end-user perspective.

Testing is structured according to the website's main functional modules:

- **User Authentication** – Registration, login, and password recovery.
- **Product Search & Navigation** – Search, filtering, and sorting.
- **Shopping Cart Management** – Adding, removing, updating products, and cart persistence.
- **Checkout Process** – User details validation, delivery selection, payment, and order confirmation.
- **Exceptional & Negative Scenarios** – Invalid inputs, out-of-stock products, session timeouts, and error handling.
- **Performance** – Page load times, search response, and checkout processing.
- **Cross-Browser Compatibility** – Consistent functionality across browsers.
- **Mobile Responsiveness** – Layout, navigation, cart, and checkout flow on mobile devices.

Testing is conducted **manually**, with documented **Test Cases** and defects reported through **Jira**, aiming to identify issues, improve product quality, and ensure a reliable and user-friendly experience.

Test Tree

Exit Criteria

The QA phase is considered complete based on the following criteria:

- All core business flows (registration, login, search, cart, checkout) were tested.
- 85% of test cases passed successfully.
- All identified critical defects were documented in Jira.
- Failed, blocked, and skipped scenarios were analyzed and documented.
- Test execution results are fully traceable in TestRail.
- No system-wide critical instability was identified.

Overview

*This project focused on **manual testing** of the Rami Levy online store, applying professional QA methodologies and advanced tools for managing test scenarios and reporting defects.*

During the testing process, I verified the functionality of the website's core processes, including:

User registration and login

Product search

Shopping cart management

Checkout and purchase

Handling exceptional and edge cases

Key Findings

Jira / Defect Management:

- The website demonstrated **high overall stability**, functioning correctly in most tested scenarios.
- Several bugs were identified, some impacting **user experience**, and were documented and tracked in Jira.
- The defect reporting and tracking process was organized, with complete documentation of all test steps.

TestRail / Test Case Management:

- Test cases were documented and executed in **TestRail**.
- **85% of test cases passed successfully.**
- **7% failed** due to functional defects.
- **4% were blocked** due to technical or environmental constraints.
- **4% were skipped** as they were outside the final execution scope.
- Test coverage included core flows, regression scenarios, and edge cases.
- Screenshots and expected/actual results were attached to ensure full traceability and reporting.

Recommendations for Improvement

1. Accessibility:

- Ensure full compliance with accessibility standards (alt text, contrast, screen reader compatibility).

2. Responsiveness:

- Optimize the website for mobile and small screens, especially in navigation areas.

3. User Experience (UX):

- Maintain consistency in key button placement.
- Improve the checkout flow and reduce visual clutter.

4. Information Security:

- Conduct additional security validation focusing on user data and transaction protection.

Conclusion

Based on the executed test scope, the website demonstrates strong functional stability, with **85% of test cases passing successfully**.

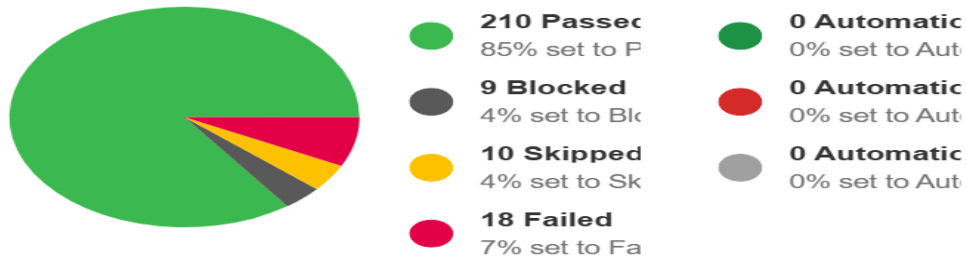

The identified failures represent specific functional issues rather than system-wide instability. Blocked and skipped scenarios were limited and did not significantly impact overall system reliability.

From a QA perspective, the system is **ready for production use**, provided that the reported defects are reviewed and prioritized accordingly.

The project reflects structured test planning, organized defect management, and clear traceability of results, demonstrating practical hands-on experience in real-world Web QA processes.

Bug Reporting (Jira)

[RLW-2] [Incorrect error message when registering with existing email](#)

Created: 18/Feb/26 Updated: 20/Feb/26 Due: 18/Feb/26

Status: To Do

Project: [Rami Levi Website](#)

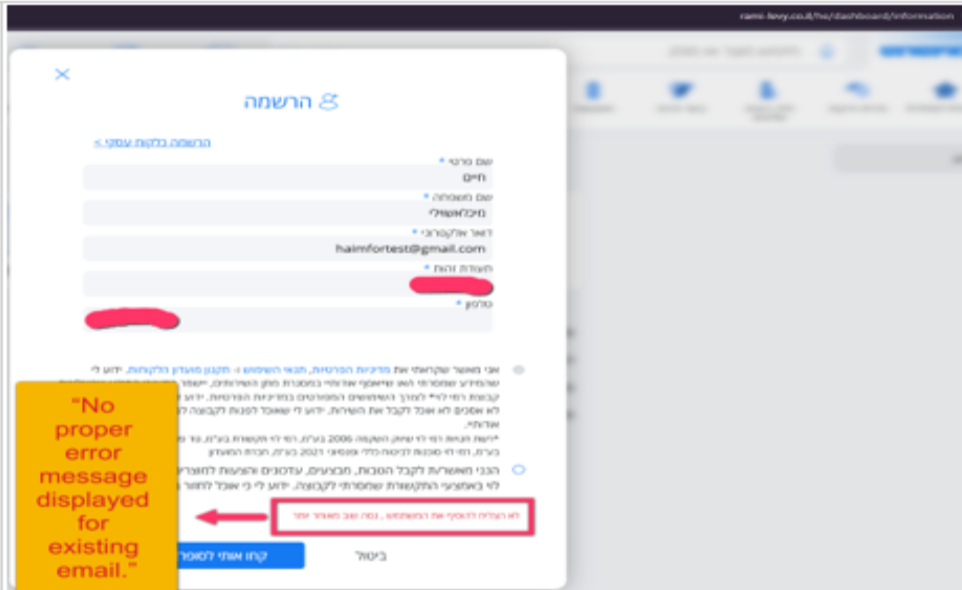

Type: Bug

Priority: High

Reporter: [Haim Michelashvili](#)

Assignee: [Haim Michelashvili](#)

Attachments:

Start date: 18/Feb/26

Severity: S3 - Major

Platform: Windows 11 Pro Google Chrome

Expected Result: Error message "Email already exists" / "המייל כבר קיים" הודעת שגיאה

Actual Result: "לא הצליח להוסיף את המשתמש, נסה שוב מאוחר יותר"

Description

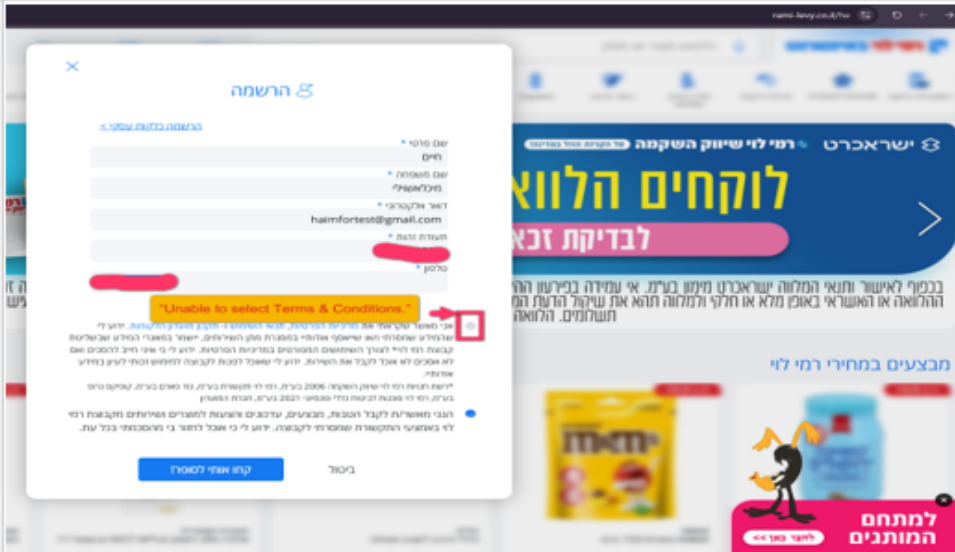

Step to reproduce

1. Go to the registration page: <https://www.rami-levy.co.il/>
2. Enter an email address that already exists in the system.
3. Fill in all other required fields (First Name, Last Name, ID number, and Phone Number).
4. Click the **Register** button.

[RLW-3] [Terms and Conditions checkbox is auto-selected by default](#) Created: 19/Feb/26 Updated: 20/Feb/26

Status:	To Do		
Project:	Rami Levi Website		
Type:	Bug	Priority:	High
Reporter:	Haim Michelashvili	Assignee:	Haim Michelashvili

Attachments:

Severity:	🔴 S2 - Critical
Platform:	Windows 11 Pro Google Chrome
Expected Result:	The Terms and Conditions checkbox should NOT be selected by default. The user must actively select (check) it in order to proceed with registration.
Actual Result:	The Terms and Conditions checkbox is pre-selected automatically.

Description

Steps to Reproduce

1. Go to the registration page: <https://www.rami-levy.co.il/>
2. Fill in all required fields (First Name, Last Name, Email, Phone, ID).
3. Do NOT manually check the "Terms and Conditions" checkbox.
4. Observe that the checkbox is already selected by default.

[RLW-5] Search does not return results for English keywords Created: 19/Feb/26 Updated: 20/Feb/26

Status: To Do

Project: [Rami Levi Website](#)

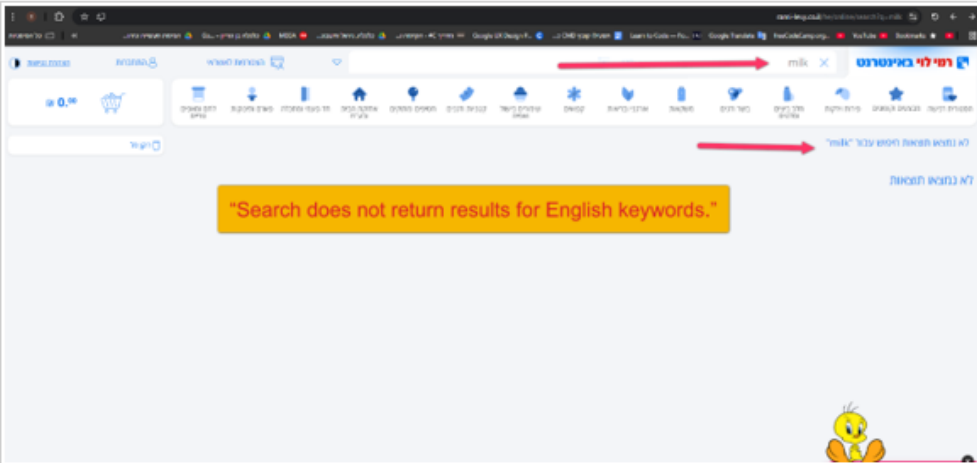

Type: Bug

Priority: Medium

Reporter: [Haim Michelashvili](#)

Assignee: [Haim Michelashvili](#)

Attachments:

Severity: 🟡 S3 - Major

Platform: Windows 11 Pro Google Chrome

Expected Result: Relevant products should be displayed even when searching in English. The search engine should support English keywords or map them to Hebrew equivalents.

Actual Result: No results are displayed for the English keyword.

Description

Steps to Reproduce

1. Open the website: <https://www.rami-levy.co.il/he/online/search?q=milk>
2. In the search bar, enter an English keyword (e.g., "milk").
3. Press Enter or click the search icon.

[RLW-7] No option to clear all filters at once Created: 20/Feb/26 Updated: 20/Feb/26	
Status:	To Do
Project:	Rami Levi Website

Type:	Bug	Priority:	Medium
Reporter:	Haim Michelashvili	Assignee:	Haim Michelashvili

Attachments:	
Severity:	S4 - Minor
Platform:	Windows 11 Pro Google Chrome
Expected Result:	User should be able to reset all filters with a single action.
Actual Result:	Actual Result: No option to clear all filters at once; user must deselect each filter individually.

Description

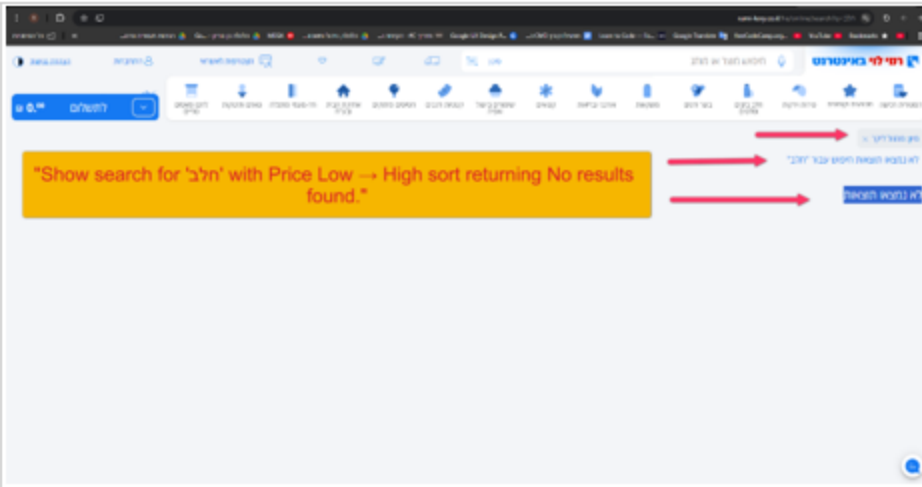

Steps to Reproduce:

1. Open site <https://www.rami-levy.co.il/he>
2. Enter "חלב" in the search bar
3. Press "סינון"
4. Apply one or more category filters
5. Look for "Clear All" or reset option

[RLW-8] [Filter/Sort by Price Low → High not working](#) Created: 20/Feb/26 Updated: 20/Feb/26

Status:	To Do
Project:	Rami Levi Website
Components:	None
Affects versions:	None
Fix versions:	None

Type:	Bug	Priority:	High
Reporter:	Haim Michelashvili	Assignee:	Haim Michelashvili

Attachments:	
Severity:	● S2 - Critical
Platform:	Windows 11 Pro Google Chrome
Expected Result:	Products are displayed from lowest to highest price.
Actual Result :	System shows "No results found" even though matching products exist.

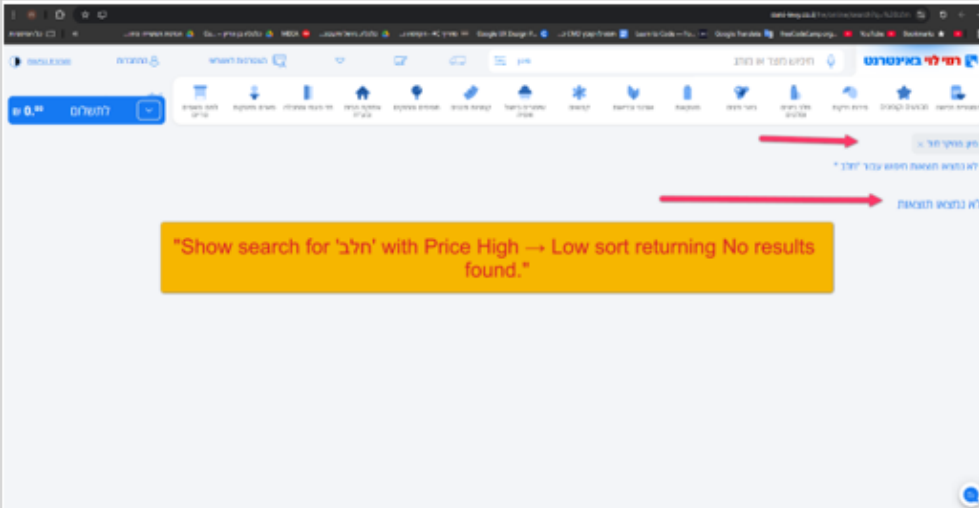

Description

Steps to Reproduce:

1. Open website <https://www.rami-levy.co.il/he>
2. In the search bar, type "חלב"
3. Apply category or product filter (optional)
4. Select sort option: Price Low → High
5. Observe product order

[RLW-9] Title: Search for "חלב" with Price High → Low shows "No results found" Created: 20/Feb/26 Updated: 20/Feb/26

Assignee: [Haim Michelashvili](#)

Attachments:

Severity: S2 - Critical

Platform: Windows 11 Pro Google Chrome

Expected Result: Products matching "חלב" are displayed in reverse alphabetical order (א - ת).

Actual Result: System shows "No results found" even though matching products exist.

Description

Steps to Reproduce:

1. Open website [רמי לוי באינטרנט - אתר קניות אונליין הגדול והזול בישראל](#)
2. In the search bar, type "חלב"
3. Select sort option: 'שם יורד'
4. Observe search results

[RLW-12] Incorrect error message when registering with existing email – Mobile Web Created: 20/Feb/26 Updated: 20/Feb/26

Status:	To Do
Project:	Rami Levi Website

Type:	Bug	Priority:	High
Reporter:	Haim Michelashvili	Assignee:	Haim Michelashvili

Attachments:

Severity:	🟡 S3 - Major
Platform:	Device: iPhone 15 Pro OS: iOS 26.2.1 Browser: Safari (Mobile) Environment: Production
Expected Result:	The system should display a clear validation message such as: "Email already exists."
Actual Result:	The system displays the message: "Failed to add user, please try again later."

Description

Steps to Reproduce:

1. Open the website on iPhone 15 Pro using Safari. <https://www.rami-levy.co.il/he>
2. Navigate to the Registration page.
3. Enter an email address that already exists in the system.
4. Fill in all other mandatory fields with valid data.
5. Accept Terms & Conditions.
6. Tap on **Register**.

[RLW-13] Terms and Conditions checkbox is auto-selected by default – Mobile Web Created: 20/Feb/26 Updated: 20/Feb/26

Status:	To Do		
Project:	Rami Levi Website		
Type:	Bug	Priority:	High
Reporter:	Haim Michelashvili	Assignee:	Haim Michelashvili

Attachments:

Severity:	🟡 S3 - Major
Platform:	Device: iPhone 15 Pro OS: iOS 26.2.1 Browser: Safari (Mobile) Environment: Production
Expected Result:	The Terms and Conditions checkbox should be unchecked by default, and the user must actively select it before registering.
Actual Result:	The Terms and Conditions checkbox is automatically selected by default.

Description

Steps to Reproduce:

1. Open the website on mobile browser <https://www.rami-levy.co.il/he>
2. Navigate to the Registration page.
3. Observe the Terms and Conditions checkbox before any interaction.

[RLW-14] Search returns random products for invalid/special character input – Mobile Web Created: 20/Feb/26 Updated: 20/Feb/26

Status:	To Do		
Project:	Rami Levi Website		
Type:	Bug	Priority:	High
Reporter:	Haim Michelashvili	Assignee:	Haim Michelashvili

Attachments:	
Severity:	🟡 S3 - Major
Platform:	Device: iPhone 15 Pro OS: iOS 26.2.1 Browser: Safari (Mobile) Environment: Production
Expected Result:	The system should display: "No results found" or a clear validation message. No unrelated products should be shown.
Actual Result:	The system returns unrelated/random products, even though no matching products exist.

Description

Steps to Reproduce:

1. Open the website on a mobile browser. <https://www.rami-levy.co.il/he>
2. Enter special characters in the search bar (e.g., `!@#`).
3. Tap the **Search** button.
